ENDURANCE® PLAYGROUND BASKETBALL SYSTEM

This unit is designed for use with regulation size aluminum frame glass, acrylic, polycarbonate or steel boards and breakaway or stationary goals. The post shall be 6" square with 1/4" wall, ASTM A500 GrB tubing. The extension arm is a triangular design using tubing welded to a heavy plate and connected to the vertical post with four 3/4" diameter "U" bolts. Two galvanized and powder coated braces, extending from the upper mounting points of the backboard to the vertical post and extension arm, provide added rigidity to the system. Post and extension arm is hot dip galvanized and then powder coated black for extended protection from corrosion.

System is available with a variety of backboards and four standard extension lengths. See below for appropriate extension, backboard and goal combination.

Model	Extension Arm	Backboard	Goal
GP104	48"	none	none
GP104S72	48"	1272B Steel	8550 Endurance Fixed
