PRO MOLD CUSHION EDGE

APPLICATION

The double sided backboard padding is 2" thick, urethane foam that protects the players while the skin molding process protects the padding. Each half is 36" long and allows for 19-3/4" to run up the side of the rectangular backboard. Each half is not symmetrical which requires one right and one left side to pad one backboard. Half sections bolt to all 72" official glass backboards that have a width of 2". Meets all NCAA, high school, and FIBA specifications.

Mounting hardware is included.

Available in the following colors:
