## MODEL 4196

### **WALL PAD ALUMINUM FULL Z-CLIP ATTACHMENT SYSTEM**

This system provides a convenient and neat alternative for attachment of wood backed wall pads without nailing lips. This system results in no exposed screws or bolts. Damaged or worn wall pads can be easily replaced.

“Z-clip” at the top and bottom of the pad are secured to the wall with an appropriate attachment method as dictated by building conditions. A second “z-clip” attached to the back of the wall pad (top and bottom) securely locks the pad in place. This product may be used with PSS wall padding, corner pads, and square column pads.

Aluminum wall pad attachment clip system is drilled in the field. Aluminum wall pad clip system shall be provided in 6 foot lengths, but may be cut to length as required by installer.

Subject to design change and current manufacturing practices.
